

SLS Global : SLEEPING BAG

(SIZES AVAILABLE: S, M, L & XL)

✉ info@sls-global.com

OVERVIEW

- A **sleeping bag** is an insulated covering for a person, essentially a lightweight quilt that can be closed with a zipper or similar means to form a tube, which functions as lightweight, portable bedding in situations where a person is sleeping outdoors.
- The main objective of this sleeping bag is to protect from extreme cold weather range between 10° Celcius to minus 50° Celcius and wind velocity up to 40km/hr.
- These sleeping bags are integrated with hood and are multi layered for use in different combinations in different temperature and weather conditions of the layers. These are light weight for easy use and carry. These sleeping bags are specially designed for Indian Army where temperatures can drop significantly.
- This Sleeping Bag has water-resistant / water-repellent properties to protect someone against wind chill and light precipitation.
- This sleeping bag is designed in mummy shape to allow body movement for comfortable sleep.
- This sleeping bag provides protection from cold, wind, snow & rain. It lets moisture to escape so as to keep the body dry and warm.
- The material used is of best quality which causes no odour and protects from allergic sensation to skin.
- This Sleeping bag comes in a water-repellent cover which can be used a bag pack for comfortable travelling. These sleeping bags are easy to clean and maintain.

BUCKLES

UNDERSTANDING THE TEMPERTAURE & LAYERING SYSTEM

Temperature In Celsius	+12°C to -5°C	-6°C to -15° C	-16°C to -29° C	-30°C to -39° C	-40°C to -47° C	-48°C to -59° C
Layer Combinations	Layer 1	Layer 2	Layer 3	Layer 1 + Layer 3	Layer 2 + Layer 3	Layer 1 + Layer 2 + Layer 3

- A 3-layer sleeping bag typically consists of an outer shell, an insulating layer, and an inner lining. Understanding these layers is crucial for maximizing your comfort.
- The outer shell is usually made of a durable, water-resistant material to protect the bag from moisture.
- The insulating layer is responsible for trapping warmth.
- The inner lining is a comfortable, soft material that you'll be in direct contact with while sleeping.
- It is very important to understand the layering of sleeping bags.
- For best comfort and warmth, you must follow above temperature guidelines and layer yourself accordingly.
- Since all human bodies are different a layer of sleeping bag can be added or reduced depending upon each individuals need.
- All sleeping bags are labelled as Layer 1, Layer 2 and Layer 3 respectively.
